

Building Blocks for the IoT

Engineering360

Building Blocks for the IoT e-newsletter covers the most critical issues affecting developers of next-generation connected devices for the Internet of Things, Industry 4.0, and consumer products. Timely and relevant topics relating to embedded systems in applications range from smartphones and wearable tech, to medical devices, military systems, industrial automation equipment, and wireless sensor networks.

It's the perfect platform to get your message out about new products, recent technology developments, product application ideas, and more.

Coverage Areas/Topics

- Operating systems
- Development/verification/simulation tools
- Programming languages
- Design tools and device testing
- Technology and market trends and more

Markets/Industries Served

Aerospace, Automotive, Communications, Computers, Defense & Security, Consumer Products/Electronics, Medical Equipment

Special Edition Issues

April 14, 2017; August 11, 2017; December 15, 2017

Reach a Highly Engaged Audience*

Our focused publications make it easy for you to support specific marketing initiatives and build awareness among a highly engaged audience of decision makers who use e-newsletters as a key resource when comparing and evaluating suppliers.

Delivery rates exceed
95%

More than
60%
of readers report reading our
e-newsletters upon receipt

3 out of 4
readers use our e-newsletters as a
primary resource in the early to
middle buy cycle stage
