

**Manufacturing Technology** e-newsletter is for engineers involved with the design and installation of robotics, automation, sensors, controls, mechanical systems and electromechanical equipment. Manufacturing engineers are not only tasked with producing the products created by design engineers, but bringing those products to market quickly at reasonable cost.

*Manufacturing Technology* addresses the equipment, components, and networking strategies that make these tasks possible – from fabrication and assembly to inspection and quality control.

### Coverage Areas/Topics

- Design and installation of robotics, automation, sensors, controls, mechanical systems and electromechanical equipment
- Automation and control
- Additive manufacturing
- Robotic systems
- Emerging trends, such as Industry 4.0

### Markets/Industries Served

General Manufacturing; Industrial Machinery/Tools and Equipment; Automotive; Aerospace and Defense; Appliances; Medical Equipment; Packaging Machinery; Utilities/Energy; Agriculture/Forestry; Oil & Gas; Paper, Printing and Textiles; Transportation; Food and Beverage

### Reach a Highly Engaged Audience\*

Our focused publications make it easy for you to support specific marketing initiatives and build awareness among a highly engaged audience of decision makers who use e-newsletters as a key resource when comparing and evaluating suppliers.
