BILLBOARDS & BANNERS

Brand Building Billboard and Banner Ad Solutions

IHS Engineering360 offers a variety of billboard and banner advertising solutions that put your products and services in front of the right audience.

DC Motors

Product Announcement Billboard Program

IHS Engineering360 Product Announcements are six-month cost-effective banner programs that get in front of your audience and generate sales opportunities:

- Appear prominently on relevant search results pages on Engineering360.com
- Announce new product/service launches or relaunches
- Push products or services that are major revenue generators
- Boost sales of slower-moving products
- Amplify product branding
- Generate qualified opportunities
- Move overstock
- Reach new markets and prospects

Ads appear prominently on relevant Engineering360.com search results pages—and link to a full-page advertisement promoting your product or service. Once there, customers can request a quote, view product details, visit your website or send you email.
