The Polymer & Composite Materials newsletter introduces readers to materials science and engineering. The newsletter explores the latest developments in polymer and composite materials, including advanced manufacturing techniques and material properties, emphasizing their applications across aerospace, automotive, and construction industries. Additionally, it delves into emerging trends such as sustainable and bio-based materials, nanocomposites, and 3D printing of polymers.

Markets/Industries Served:

- Aerospace
- Automotive
- Building & Construction
- Engineered Materials
- Military & Defense
- Medical & Healthcare
